Irvine, CA

ABOUT

Highly passionate and user-focused front-end engineer with advanced knowledge in UI/UX and programming. Adept at contributing to collaborative work environments and finding creative solutions to enhance user experience. Designed and developed intuitive, aesthetic, responsive web applications across multiple APIs primarily using HTML, CSS, Javascript, and React

PROJECT

Personal Project (Frontend & Full-stack Engineer)

Todo List (In-progress)

Created a todo web application that allows users to create, delete, prioritize task lists and change color themes using React. Integrated MongoDB server to add/delete/update list input and status

Country Finder

Implemented the Country Searching application with React, Sass, Rest API. Added search engines to explore data and responsive interfaces to display Country details

Galleria

Developed an art gallery slideshow website that presents a collection of artworks by adding animation effects with HTML, CSS, jQuery, and Javascript.

Kneron Auto Notify Tailgating (ANT) 2022_01-2022_06 Frontend Engineer 📍 Senior Design Project, UC Irvine

- Worked as a team of five members on Kneron home security app using facial recognition technologies
- Designed UI structures to communicate with Django server and implemented essential features with React Native and Firebase, such as authentication and push-notifications, in six months
- Acquired agile project management skills with weekly stand-ups by utilizing scrum management tools

WORK EXPERIENCE

Yondo 2021_06-2021_09 UI Design Intern 📍 Los Angeles, CA (remote)

- Deployed responsive and concise interface designs for new VOD platform and booking calendar with Adobe XD
- Cooperated with the director and developers to identify requirements and needs for development.
- Collaborated in another project after internship period and created prototypes of E-book platforms in 2022
